

Office of State Procurement  
State of Louisiana  
Division of Administration

JOHN BEL EDWARDS  
GOVERNOR

JAY DARDENNE  
COMMISSIONER OF ADMINISTRATION

**ADDENDUM No. 2**  
**June 10, 2016**

Your reference is directed to File No. X 92896 P, Solicitation No. 3000005394 scheduled to be opened at 10:00 A.M. CT on June 28, 2016 for Statewide Aquatic Plant Control Services and Herbicide Application by Boat and Helicopter.

**The following changes are to be made to the referenced solicitation:**

**RFP, Part II Scope of Work/Services, 2.6.1 Technical Proposal, Seventh (7<sup>th</sup>) Bullet Point, first (1<sup>st</sup>) sentence**

**Currently reads:** For each service (boat and/or helicopter) proposed, references from at least three (3) State or other government agencies, or private firms for whom services with similar or larger scope have been provided in the last two (2) years.

**Changed to read:** For each service (boat and/or helicopter) proposed, references from at least three (3) State or other government agencies, or private firms for whom services with similar or larger scope have been provided in the last five (5) years.

**Add the following Attachments:**

Attachment K: Summary of Services for Inland Fisheries Aquatic Vegetation Control Program.  
Attachment L: Statewide Aquatic Weed Acreage Estimates.  
Attachment M: Inland Fisheries-Aquatic Plant Control Program 2015 Herbicide/Surfactant Used.  
Attachment N: Vendor Supplied Charts  
Attachment O: Louisiana Marine Boat Launches  
Attachment P: Public Freshwater Ramps

**Proposer's written inquiries received and State answers are attached.**

This addendum is hereby officially made a part of the referenced proposal.

**ACKNOWLEDGMENT:** If you have already submitted your proposal and this Addendum does not cause you to revise your proposal, you should acknowledge receipt of this Addendum by identifying your business name and by signing where indicated. You may return this Acknowledgment by mail to: Office of State Procurement, P.O. Box 94095, Baton Rouge, LA 70804-9095, by hand delivery or courier to: Office of State Procurement, 1201 N. Third Street, Claiborne Building, Suite 2-160, Baton Rouge, LA 70802, or by fax to: (225) 342-9756. The State reserves the right to request a completed Acknowledgement at any time. Failure to execute an Acknowledgment shall not relieve the Proposer from complying with the terms of its proposal.

Addendum Acknowledged/No changes:

## Vendor's Written Inquiries and State's Responses

Request for Proposal  
Statewide Aquatic Plant Control Services and Herbicide Application by Boat and  
Helicopter  
Solicitation #3000005394  
File # X 92896 P

**Question 1:** Could you tell me the proposed amount of acreage that will be done by helicopter? I could not find that information.

**Response:** As it relates to Louisiana Department of Wildlife and Fisheries (LDWF) initiatives, herbicide application by helicopter is done on an as-needed basis and varies from year to year. Please see below for acreage sprayed by helicopter for the Inland Fisheries Aquatic Plant Control Program by year and district from 2013-2015. This may serve as a guide for 2016, but there is no guarantee that past performance will be recurrent. Additionally, please note that these numbers are specific to the Inland Fisheries Aquatic Plant Control Program and not agency wide.

Year	District	Area/Waterbody	Date	Acres-Aerial	Days-Aerial
2013	4	Red River	8/27/2013	609	2
2013	4	Spring Bayou	n/a	280	1
2014	4	Spring Bayou	n/a	300	1
2015	6	Caddo Lake	9/2/2015	400	1

Other divisions, sections or programs within LDWF, state agencies, or governmental entities may utilize this contract mechanism. It is currently unknown, however, at this time regarding their anticipated need or expected usage.

**Question 2:** I am trying to get information on a past bid for Apply Herbicide by boat per District for Wildlife and Fisheries. Solicitation # 2257295, date issued 5/14/14 bid open June 4, 2014. I would like to know the bidders and their prices.

**Response:** To obtain this information, please submit a public records request to Lillie Christopher at [Lillie.Christopher@la.gov](mailto:Lillie.Christopher@la.gov).

**Question 3:** I was unable to attend pre-proposal conference due to a problem Associated with paraplegia and would like to know the projected acres to be sprayed by helicopter.

**Response:** Please see response to Question #1.

**Question 4:** Attachment B Herbicide #4 - Each gallon of mix consist of a 3 herbicide quantity, when totaled the mix consist of 130oz. not 128oz which is a gallon. All other herbicides used in this bid total 128oz, can you explain please.

**Response:** The mix contains 2 oz. of Clipper, which is a dry granular herbicide. The dry granular herbicide is water soluble and does not add to the total liquid volume of the mix. Therefore, there is a total of 128 fluid ounces in the mix. Herbicide #4 mix is the only mix that includes a granular herbicide.

**Question 5:** Section 1.5, Proposal Response Format states, "Proposals submitted for consideration should follow the format and order of presentation described below"; moreover, Section 1.5, B – Table of Contents instructs to organize it "... in the order cited in the format contained herein."

In an effort to prepare and submit a bid that is easy to understand and navigate, all while complying with the third sentence in Section 1.5.2, Legibility/Clarity that states, "Proposals prepared simply and economically, providing a straightforward, concise description of the Proposer's ability..."

Looking at the given format to follow, I can see places in which it would be beneficial to have additional subsections within the Table of Contents and throughout.

Will adding subsections, as needed, be accepted and not considered as straying from the format given?

**Response:** Subsections in regards to the Proposal will be accepted, however price sheets (Attachments C, D & E) cannot be modified when submitted.

**Question 6:** With regard to Attachment B, Herbicide Mixes – Can you give some clarification on the way some of these mixes are broken down? *For example, Herbicide #1 Mix requires .75 gal/acre of Glyphosate, but on the second line it shows the mix requiring 77oz of Glyphosate.*

I notice that all of the ounces of the second lines' chemical come out to 128oz (1 gal), but how are you getting 77oz from .75 gal/acre? Wouldn't that be 96oz?

**Response:** The glyphosate at 0.75 gal/acre or 96 oz/acre is the application rate. The 77 oz. of glyphosate, 26 oz. of diquat, and 25 oz. of Turbulence is the amount of each herbicide/surfactant required to create one gallon of billable mix.

#### **Application Rate**

Glyphosate (0.75 gal/acre) + Diquat (0.25 gal/acre) + Turbulence (0.25 gal/acre)  
Glyphosate (96 oz/acre) + Diquat (32 oz/acre) + Turbulence (32 oz/acre)

Herbicide/Surfactant	Application Rate	% Herbicide/Surfactant
Glyphosate	96 oz./acre	60 %
Diquat	32 oz./acre	20 %
Turbulence	32 oz./acre	20 %

#### **1 Gallon of Mix (128 oz.)**

Herbicide/Surfactant	Fluid Ounces of Herbicide/Surfactant in 1 Gallon of Mix	% Herbicide/Surfactant
Glyphosate	76.8 oz. (77 oz.)	60 %
Diquat	25.6 oz. (26 oz.)	20 %
Turbulence	25.6 oz. (25 oz.)	20 %

**Question 7:** Is it possible for you to release a list of last year's (or the most recent version of this contract) awardee prices?

**Response:** See answer to Question #2.

**Question 8:** Per 1.5.2 Legibility/Clarity, on page 12 of the RFP. This section requires the proposer to demonstrate an understanding of requirements. Therefore, we have come up with these questions, and provided charts for your ease of use. This information allows best value and price for LADWF, based on economy of scale, work order duration, and location distance.

For 2015, please provide the following information by district: revenue spent, acres treated, number of airboats, skiffs, and helicopters. (Reference Attachment N of this Addendum – Vendor Supplied Charts #1)

**Note:** “Vendor Supplied Charts” are found contained in Attachment N of this Addendum.

**Response:** Please refer to Attachment K of this Addendum for acres treated in 2015. Note that in the current contracts, both airboats and skiffs are included in a single day rate price. The quantity and number of boat days for each type of boat (airboats v. surface drives/skiffs) are not reportable in the database and therefore not available.

For previous contracted application efforts, revenue expended per month for each district is not available due to the current reporting format, which will be amended for future efforts. Additionally, expenditure reports for contracted services are run by fiscal year (July 1 - June 30) and not by calendar year (January 1 – December 31). For FY 2014-2015 (July 1, 2014 – June 30, 2015), LDWF expended approximately \$1,455,222.13 in contracted services to assist in aquatic herbicide spraying efforts associated with Inland Fisheries' Aquatic Plant Control Program. This includes \$20,432.00 for herbicide applications by helicopter and \$1,434,790.13 for herbicide applications by boat.

**Question 9:** For 2015, by district, what are the day rate charges for the following: helicopter, airboats and skiffs? (Reference Attachment N of this Addendum – Vendor Supplied Charts #2)

**Response:** See answer to Question #2. Note that in the current contracts, both airboats and skiffs are included in single day rate price.

**Question 10:** For 2015, by district, what were the major bodies of water that were treated? Please list bodies of water, or general description if it is in a coastal marsh area. (Reference Attachment N of this Addendum – Vendor Supplied Charts #3)

**Response:** Please refer to Attachment K of this Addendum.

**Question 11:** What are the main boat launch locations, by district, for the major bodies of water to be treated? (Reference Attachment N of this Addendum – Vendor Supplied Charts #4)

**Response:** Please refer to Attachment O Louisiana Marine Boat Launches and Attachment P Public Freshwater Ramps of this Addendum.

**Question 12:** For 2015, what is the quantity of equipment used, by month, for the following: helicopter, airboat, and skiff? (Reference Attachment N of this Addendum – Vendor Supplied Charts # 5)

**Response:** Please refer to Attachment K of this Addendum for start dates of herbicide application by boat and helicopter for 2015. Please note that the herbicide application work orders are not reportable by month. For a particular application effort, there may be overlap between months due to late month start date, the duration of the effort, weather delays, or other factors. Nevertheless, the provided start dates should sufficiently inform as to when spraying activities usually occur. See response to Question #8 regarding breakdown between airboats v. surface drives/skiffs.

**Question 13:** In 2015, by district, please list the quantity of concentrated herbicide gallons. (Reference Attachment N of this Addendum – Vendor Supplied Charts #6)

**Response:** Please refer to Attachment M of this Addendum.

**Question 14:** For 2015, by district, please list the acres treated for the following weed species listed. (Reference Attachment N of this Addendum – Vendor Supplied Charts #7)

**Response:** Please refer to Attachment K of this Addendum.

**Question 15:** For 2016, what is the budget per district, the estimated amount of days, equipment needed, and number of acres to be treated? Remember, this forecast is based on historical data from previous years. We know it is not a guarantee amount of work, as it is for RFP purposes. (Reference Attachment N of this Addendum – Vendor Supplied Charts #8)

**Response:** The LDWF Aquatic Plant Control budget is statewide and not specific on one particular district. LDWF biologists routinely conduct vegetation assessments in the districts,

and herbicide applications are performed on an as-needed basis. Expenditure reports for contracted services are run by fiscal year (July 1 - June 30) and not by calendar year (January 1 – December 31). For FY 2014-2015 (July 1, 2014 – June 30, 2015), LDWF expended approximately \$1,455,222.13 in contracted services to assist in aquatic herbicide spraying efforts associated with Inland Fisheries' Aquatic Plant Control Program. This includes \$20,432.00 for herbicide applications by helicopter and \$1,434,790.13 for herbicide applications by boat. This may serve as a guide for fiscal year 2016-2017, but there is no guarantee that past performance will be recurrent.

Additionally, please refer to Attachment K of this Addendum for 2015 aquatic vegetation control data. This may also serve as a guide for 2016, but there is no guarantee that past performance will be recurrent.

**Question 16:** For 2016, by district, what are the major bodies of water to be treated? Please list bodies of water, or general description if it is in a coastal marsh area. (Reference Attachment N of this Addendum – Vendor Supplied Charts #9)

**Response:** Please refer to Attachment K of this Addendum for 2015 aquatic vegetation control data. This may serve as a guide for 2016, but there is no guarantee that past performance will be recurrent. However, most of the bodies of water treated in 2015 receive regular and consistent treatments.

**Question 17:** For 2016, what is the projected quantity of equipment to be used, by month, for the following: helicopter, airboat, and skiff? (Reference Attachment N of this Addendum – Vendor Supplied Charts #10)

**Response:** The following is provided assuming that Question #17's "equipment" refers to helicopter, airboat, and skiff and not particular spraying equipment such as fixed or articulated spraying booms, hand-held booms with multiple nozzles, hand held spray guns, etc., which are not specifically reported in the database and therefore not available. Please refer to Attachment K of this Addendum for start dates of herbicide application by boat and helicopter for 2015. This may serve as a guide for 2016, but there is no guarantee that past performance is recurrent. Please note that the herbicide application work orders are not reportable by month. For a particular application effort, there may be overlap between months due to late month start date, the duration of the effort, weather delays, or other factors. Nevertheless, the provided start dates should sufficiently inform as to when spraying activities usually occur. Note that in the current contracts, both airboats and skiffs are included in a single day rate price. The quantity and number of boat days for each type of boat (airboats v. surface drives/skiffs) are not reportable in the database and therefore not readily available.

**Question 18:** In 2016, by district, please list quantity of concentrated herbicide gallons of products you expect to use. Also, please indicate if generics are acceptable. (Reference Attachment N of this Addendum – Vendor Supplied Charts #11)

**Response:** LDWF biologists routinely conduct vegetation assessments in the districts, and herbicide applications are performed on an as-needed basis. Please refer to Attachment M of this Addendum for 2015 aquatic vegetation control data. This may serve as a guide for 2016, but there is no guarantee that past performance will be recurrent. Herbicide specifications listed in Attachment B of the RFP must be followed. If only a specific trade name herbicide/surfactant is listed, then the contractor must utilize that specific trade name herbicide/surfactant. Only when "equivalent" is listed in an herbicide specification detailed in Attachment B of the RFP may the contractor utilize industry acceptable substitutions. All herbicides and surfactants must be certified for aquatic use.

**Question 19:** For 2016, by district, what is the acre forecast for major invasive weed species? (Reference Attachment N of this Addendum – Vendor Supplied Charts #12)

**Response:** Please refer to Attachment L of this Addendum for the Fall 2015 invasive aquatic weed acreage estimates. Note that the fall estimates are usually the highest estimates because they are conducted at the end of a full growing season. This may serve as a guide, as the 2016 spring aquatic weed estimate surveys are currently underway and have not been compiled at this time.

**Question 20:** Under Section 1.5, proposal response format on page 12, "Financial Capability", what specific and basic financial information is needed for this RFP, ex: income statement, balance sheet, etc. (The minimum information required is preferred by our company). Will a letter of credit from bank/bonding Company be acceptable, in lieu of financial statements?

**Response:** A financial statement defined as: A written report which quantitatively describes the financial health of a company. This includes an **income statement (Profit & Loss – P&L) and a balance sheet**, and optionally a cash flow statement. A letter of credit is not an acceptable substitution.

**Question 21:** On specified herbicides sole sourced that have industry acceptable substitutions, will this be allowed within this contract?

**Response:** Herbicide specifications listed in Attachment B of the RFP must be followed. If only a specific trade name herbicide/surfactant is listed, then the contractor must utilize that specific trade name herbicide/surfactant. Only when "equivalent" is listed in an herbicide specification detailed in Attachment B of the RFP may the contractor utilize industry acceptable substitutions. All herbicides and surfactants must be certified for aquatic use.
